

BLOKAD7 CRASH- RATED GATE

Fortify access control points with BLOKAD7 crash-rated gate.

PAS 68 crash-tested

BLOKAD7 sliding gate is independently tested and certified to PAS 68 criteria with classification: (V/7500/80/90:0.0/2.6).

Zero penetration

Certified to stop a 7,500 kg truck with no penetration past the gate.

Continued protection

The vehicle is completely immobilized and does not create an opening in the gate during impact. This removes the possibility of a second ram attempt.

Durable heavy duty components

Duty rating power supplied from a 1.5 kW motor designed for continuous smooth and quiet operation with heavy-duty wheels and high-quality rollers and bearings.

Optional control systems

Vehicle detector loops, safety photocells, and safety edges combined with audible alarms and flashing beacons reduce the risk of accidental damage.

Crash-rated perimeter options

Protect your complete perimeter with Guardiar's range of crash-rated barriers and static bollards.

Formerly

B BETA FENCE

Guardiar's 7m BLOKAD7 sliding gate provides highly effective protection against vehicular attacks aimed at entry points.

- Protects your facility and your people against unauthorized entry attempts
- Reliably stops and immobilizes threats
- PAS 68 tested and certified
- Low maintenance

Security level

PROTECTING THE FUTURE, TODAY.™

SPECIFICATIONS

- Operating speed: 0.25 m/s
- Control System operating temperature: -25°C to 50°C
- Duct work for electrical connections in foundation
- Electric controls
- 1 or 3 phase power supply
- Gate controller interface
- Manual override system and mains power supply isolator

MATERIALS

Heavy gauge S355 and S275 steel

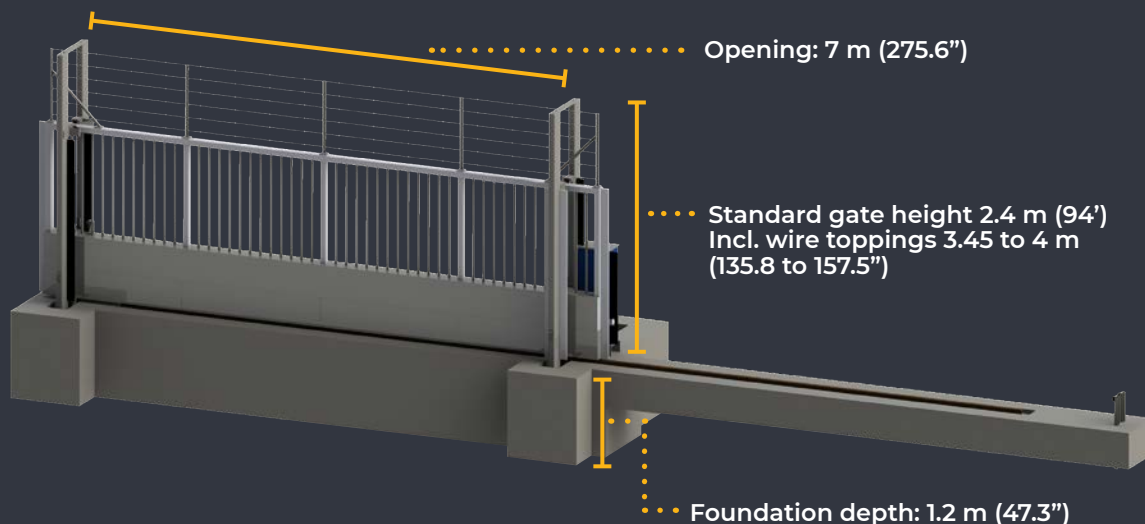

WARRANTY

12 Months parts & labour

COATING & COLOURS

- Shot blast
- Arc zinc spray
- Primer and wet painted in these standard colours:
 - Black RAL 9005
 - Anthracite RAL 7016
 - Green RAL 6009

DIMENSIONS

WHAT WE DO

We provide total perimeter solutions from ideation to product sourcing, implementation, and capital structuring.

We give our clients access to unrivaled, market-leading security products and expertise so that your people and your most valuable assets are secure.

We manufacture, source, and integrate world-class perimeter security components into one coherent and robust system. This extends beyond the perimeter to include crash-rated access control, intrusion detection, long-range surveillance, and a pro-active management system.
